16	26.09.2011	The Office for Vocational Upgrading in Kielce	Jerzy Wątroba- president Danuta Zięba - director
17	19.10.2011	The Office for Vocational Upgrading in Kielce	Jerzy Wątroba- president Danuta Zięba - director

The workshops were held with 10 institutions (government, self-government, educational, craftsmen and entrepreneurs, vocational education schools and offices, business support institutions).

The purpose of these workshops was, among other things:

- to discuss the matters of existing state of vocational education (with particular attention paid to construction sector);
- the perspectives of vocational education in świętokrzyskie region;\
- competences of government and non-government institutions in vocational education;
- evaluation of labour market connected with vocational education;
- the matter of vocational training courses (construction sector);
- the matter of incentives to educate at vocational education schools including modern and innovative professions;
- how to improve vocational education system;
- conformity of education with the EU initiatives, including new energetic strategy for Europe 2011-2020;
- cooperation of Business Supporting Institutions with vocational education institutions and enterprises;
- performance of the program for long-life vocational learning;
- pro-ecological vocational specializations;
- cooperation of SMEs in investment in vocational education and vocational apprenticeships;
- the analysis of adaptation of future vocational skills to labour market needs;
- activities of government and self-government administration for vocational education.

Some conclusions of those workshops were included in our elaboration. The workshops showed that there is a gap between cooperation of business / entrepreneurs sector and vocational education system and there is no good cooperation between those sectors / branches. The institutions participating in our workshops were satisfied- for the opportunity of expression of their remarks, proposals and opinions and their hope that some their proposals and suggestions will improve the existing state of vocational education system and better cooperation of business-entrepreneurs- education institutions
